

OptiSmooth MD[®] Meatal Dilator

Optimum smoothness Optimum comfort

Hydrophilic Coated Meatal Dilator with Anatomical Grip Handle and Tapered Tip

Introducing the new Meatal Dilator for when you are faced with a narrow passage

Vesica Urology Ltd

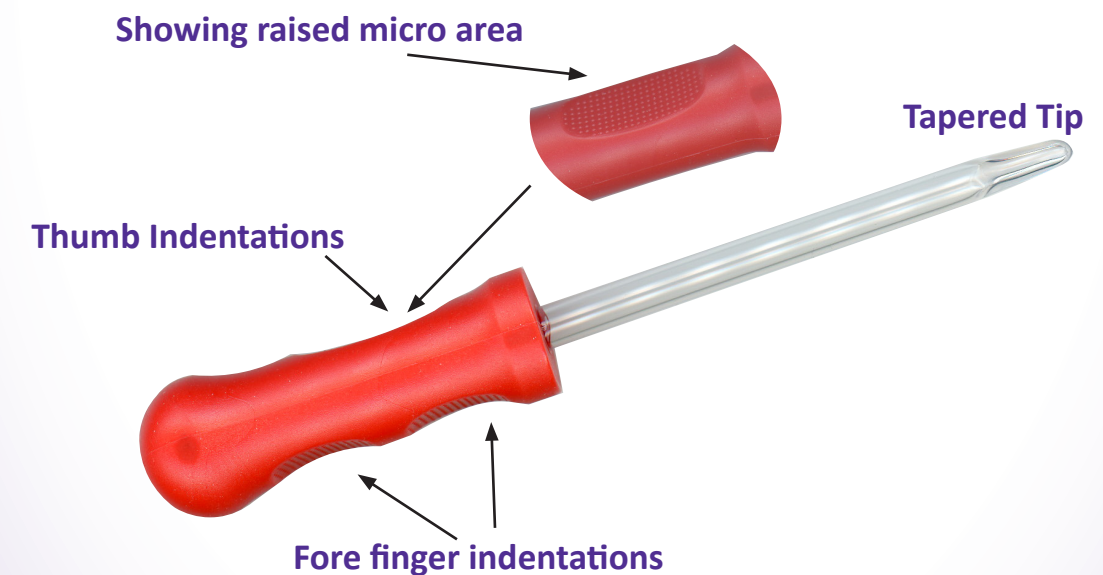

OptiSmooth MD Meatal Dilator Key Features

- Anatomically designed No Touch grip handle developed specially for a more controlled comfortable insertion and removal. The innovative grip has 3 unique indentations for two forefingers and a thumb to allow complete control of the dilator prior to insertion. Each indentation has raised micro areas to give further grip and control.
- Tapered tip helps with the insertion with meatal strictures female urethral tight spots and stenosed stomas.
- Supremely smooth and stable advanced hydrophilic coating which activates within 30 seconds of contact with water. Unlike many other hydrophilic dilators the coating stays on the dilator and also resists drying out, providing optimum comfort on insertion and removal. Requires water to be added to product pouch (tap water is fine).
- Two finger holes to aid opening of the packaging. Just peel apart in opposite direction to gain access to the dilator.
- Sticky Pad allows the OptiSmooth MD meatal dilator to be secured to a clean surface allowing you time to prepare.
- Meaningful product codes OSMDIL for OptiSmooth MD meatal dilator, the final two numbers are the charriere size (catheter thickness).
- FOR SINGLE USE ONLY

OptiSmooth MD Meatal Dilator Product Range
